## The Duty Estimator

The Duty Estimator provides a faster way to ascertain an estimation of the payable duties and taxes following the supply of the Currency, Item Cost, Shipping, and package for selected commodities/items. This feature allows the user to search by using a part or all the 10 Digits Tariff Code or the description of a given commodity (figure 1.1).

- Select the Currency from the dropdown menu or enter the desired currency using the search option from the dropdown menu.
- Input the necessary data such as the Shipping Cost, Insurance and Transport Mode.
- Tap/Select "new item" the first commodity entered if there are multiple items. (Tariff code/description, total item cost, number of items and package types.) If there is another item, then select "Add item". See figure 1.1.
- If the shipment is deemed commercial, select the check box "This is a commercial item".

The user can click **Estimate My Duty** (figure 1.2) once all mandatory fields are populated. The system will calculate all duties and taxes (figure 1.3). If the user wants, they can add another item (figure 3.2), then select "Estimate my Duty" and all the duties will be calculated and displayed separately.
